

PM.0001

Approved Country List

Annex to PM.0001

Version: 1.0

Last updated: 26-11-2025

Introduction

This document serves as the Annex: Approved Countries List for the Proba Paulownia Methodology PM.0001

As explained in the methodology, the list includes non-EU countries with agroclimatic, economic, and regulatory conditions similar to those validated within the European Union. A country may be added when the project developer provides sufficient evidence that these conditions are comparable. Evidence will be stored by Proba and can be reviewed during VVB audits.

Approved Countries

- *(Add approved countries to the list below as they are evaluated and validated.)*
